

PLEASE READ THIS ENTIRE DOCUMENT PRIOR TO INSTALLATION OF YOUR TRANSMISSION.

Used Automatic Transmission Limited Warranty & Installation Maintenance.

THANK YOU for your purchase of this quality recycled used auto part from Knucklebusters Automotive. Not only have you saved a considerable amount of money over a new part, but you are helping the environment by recycling.

Prior to installation of your recycled used auto part, we suggest that you perform the following pre-installation maintenance. By performing the pre-installation maintenance you will prolong the life of your recycled part and protect its warranty.

This used transmission comes with a _____ day warranty under normal driving conditions. For complete warranty information please refer to your sales receipt. All limited warranties are void if transmissions have been dismantled or disassembled in any manner prior to inspection by Knucklebusters or an authorized agent we assign.

PRE-INSTALLATION MAINTENANCE

- Replace front seal (torque converter seal);
- Replace axle seals (FWD, AWD) where applicable;
- Replace rear seal/gasket (output/drive yoke) where applicable;
- Install NEW Transmission Filter;
- Flush and inspect transmission cooler lines with an approved line/cooler flush fluid/system;
- Add the PROPER type of transmission fluid to the levels designated by the original manufacturer's recommendations for the vehicle;
- Properly align and fully install torque converter;
- Adjust the throttle position sensor/detent cable/kick-down cable as applicable.

NOTE: When interchanging between years and models, it may be necessary to change wiring, linkages, speed sensor(s) and/or gears as necessary to maintain the originality of your vehicle.
